**Subject:** Bonner Lands- Additional municipal drain comments

All,

I have had subsequent conversations with Gerd Uderstadt and wanted to confirm the following.

Comment 1.8 – is most applicable to those contributing directly to the gray drain (i.e. portion of lands draining towards the northern SWM pond)

Comment 1.9 – should be revised to include Lot 57 – 61.

In addition, Gerd was able to dig up a really old plan that indicated a tile was supposed to be installed to drain Mrs. Bonner's pond through 3 other lots. There is no record of this work being done but Gerd suspects it was done privately, but cannot confirm. He suggested the 3 downstream homeowner's should be notified of the proposed subdivision works. I suspect the downstream landowners will be notified in the circulation of the notice of public meeting but I wanted to bring it to your attention.

Regards,  
Jackie
